

PRIMP

Preventative Review Inspection Maintenance Program

Condominium Home Owner Associations

PRIMP, has been developed as our way of saying thank you for choosing us for your painting needs. PRIMP, is a service that is done at no additional cost and will begin at the time we start the project and continues for 24 months after the project is complete. Here is what PRIMP will provide to the Home Owners and it's Association.

- Completely paint one large area of a building
 - Caulk, prime and paint body and trim
 - To enable your painting committee the ability to finalize the selection of colors and to see a portion of what the finished product will look like.
- After 12 months, we will return to review the paint project and perform the following:
 - Do a complete walk through inspection with complex manager.
 - Touch up any minor paint chips or dings that may occur from people moving in or out of the complex.
 - Wash down all buildings to remove any dirt or grime to help keep the buildings looking freshly painted.
 - Write up and present a complete report of our findings.

Please call 12 months after the completion of the project to schedule an appointment for us to return.

Grant Brown, President
